Fig. 17.1   The predefined symbolic constants.

Symbolic constant	Description
`__LINE__`	The line number of the current source code line (an integer constant).
`__FILE__`	The presumed name of the source file (a string).
`__DATE__`	The date the source file is compiled (a string of the form `"Mmm dd yyyy"` such as `"Jan 19 1994"`).
`__TIME__`	The time the source file is compiled (a string literal of the form `"hh:mm:ss"`).
`__STDC__`	The integer constant 1. This is intended to indicate that the implementation is ANSI compliant.
